

After installation ...

- Use a screwdriver to open the air vent, open the inlet valve and let the water rush into the radiator. Check all connections for leaks.
- Once water overflows from the air vent, there is no air in the tube.
- Use a screwdriver to close the air vent. Turn on the outlet valve and the radiator is ready for use.

After care ...

- Classic Radiators are made from Steel with chrome plating, and should not be cleaned with corrosive or scouring cleaning agents.

Please note...

- This product can only be used at PN<1MPa (10Kg/cm², 10Bar), it should only be filled with water, and at a temperature below 100°C (212°F). See table below for installation requirements.
